DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species A: figures 1-3, 8, and 10;

Species B: figures 4, 16, 17, 20, 23, and 26;

Species C: figures 5-7, 9, and 11; and

Species D: figures 12-15, 18, 19, 21, and 22.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Species A: claims 1-6; Species B: claims 1, 2, 4, 7-13, 15, and 18-21; Species C: claims 22-24, 27, and 28; and Species D: claims 22, 25, 29, 30, 31, 33-36, and 38-51.

Art Unit: 3683

It appears upon a cursory review that claims 14, 16, 17, 26, 32, and 37 fail to read on any of the illustrated embodiments. The applicant is required to review all claims carefully and ensure that all claimed limitations are present in the illustrated embodiments as is required by 37 CFR 1.83(a).

The following claim(s) are generic: no claims appear generic.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the instant invention discloses a variety of shock absorbers, one embodiment comprises a piston rod axially extending between two piston cylinders, a second embodiment discloses an individual piston rod for each piston cylinder, yet another embodiment discloses a sleeve disposed around the piston cylinders.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas J. Williams whose telephone number is 703-305-1346.

The examiner can normally be reached on Monday-Thursday (6:30-4:00) alternate Fridays.
